

Accounting & Financial Reporting

Etonien provides as-needed individual and team-based accounting and finance resources to clients seeking technical assistance. Our resources serve a range of companies from start-ups first establishing their financial records to private and public companies looking to enhance their accounting and financial reporting.

Extensive operational and deep technical accounting experience means seamlessly assisting departments with projects ranging from busy seasonal demands for quarterly and annual financial report preparation to unique projects requiring highly specialized skills. Additionally, our accounting and financial reporting services are used to facilitate private equity firms' transitioning of portfolio companies and also to assist companies with "going public" documentation and related regulatory filings.

Specific Solution Areas

- Financial and SEC reporting including 10K's and 10Q's
- GAAP and FASB pronouncements - implementation of new accounting standards
- IPO readiness projects
- Financial statement consolidations
- IFRS implementation
- Complex revenue recognition projects
- Process re-engineering
- Streamlining the month end close process
