

Corporate Tax Support

Combined with the recent economic downturn, the continually increasing complexity and fee structures of public accounting firms are forcing finance executives to source cost effective alternatives for tax support.

Etonien's project and interim corporate tax resources come at a lower cost than the entry level point of the public accounting firms, and because of their experience make projects more efficient in terms of overall hours.

Our project and interim tax resources join us with a minimum of 10 years combined public accounting and corporate department tax experience, possess a CPA and also hold advanced tax degrees.

Our specific tax solutions include

- FASB ASC 740 (formerly FAS 109) calculations and process reviews
- FIN 48 reviews
- Assistance with tax regulatory audits
- Assistance with tax preparation for international, federal and state/local tax authority filings
- Review and documentation of internal tax controls
- Sales and use tax, property tax and associated tax filing issues support

In addition to general support for your tax function, Etonien resources also offer you expertise in tax software implementations, tax due diligence for mergers and acquisitions and litigation support.
